

Library Program's Purpose Statement:

AgeOptions' Library Program grant awards are provided to local public libraries in suburban Cook County. The mission of the Library Program is to **increase digital familiarity** (e.g. comfort in using technology, navigating the internet, utilizing digital platforms and applications, such as Zoom, Facebook and more) and **address social isolation** (such as having few friends and the loss of family) in communities by providing resources through technology and targeted programming to build community engagement.
